

OUTDOOR, BATHROOM AND KITCHEN CONCRETE

KIT- INSTRUCCIONES FOR USE

Suitable for floors laid with glue on dry, flat and compact screed.

YIELD: 10 mq

PART A - WASH

HOW TO WASH CONCRETE

DILUTION: 1+4 (500 ml of product in 2 liters of water)

1. Start the wash cycle 24 hours after the cementitious grout (we do not recommend epoxy grout).
2. After grouting the tiles, on the dry floor, perform the washing.
3. Dilute the product **A wash** with water respecting the recommended dilutions.
4. Protect any surfaces (wooden, galvanized, copper, etc. ..) that could come into contact and therefore be attacked by the product.
5. Distribute the diluted solution on the tiles and leave to act for 5-20 minutes.
6. Clean the surface with a pad to wash the product and open the porosity.
7. Be sure to rinse well with water using a damp sponge.
8. Wipe up excess product. Pick up with vacuum bin or cotton cloths before it is reabsorbed by the material.
9. Wait 24/48 hours (at a minimum temperature of 20°C) for complete drying.

PART B - TREATMENT

HOW TO TREAT CONCRETE

DILUTION: Ready to use.

OUT OF POWDER: 1 hour.

WALKABILITY: 2 hours.

TOTAL DRYING: 48 hours.

TOOL CLEANING: Wash with water.

1. After 24/48 hours, after washing the tiles and on a clean and dry floor, carry out the treatment.
2. Shake before use. Pour the contents of the bottle **B treatment** in a container.
3. Always test the product on a loose tile before applying it on the whole surface, in order to check the degree of absorption of the tiles.
4. Spread the product with brush/brush evenly over the concrete surface until it is saturated. Do not apply too much product. Excessive use may leave stains on the surface.
5. Wait 2 hours for the product to dry completely.

OUTDOOR, BATHROOM AND KITCHEN CONCRETE

KIT- INSTRUCCIONES FOR USE

Suitable for floors laid with glue on dry, flat and compact screed.

YELD: 10 mq

PART C - FINISH

HOW TO FINISH CONCRETE

DILUTION: Ready to use, but can be diluted up to 50% with distilled water.

USE: Use 500 ml for the first coat and the other 500 ml for the second.

500 ml
PRODUCT

500 ml
PRODUCT

1. 2 hours after tile treatment, on the clean and dry floor, do the finishing.
2. Shake before use; pour contents of **C finish** bottle into container.
3. Always test the product on a loose tile before applying it to the entire surface to check the degree of tile absorption.
4. Spread the product evenly over the concrete surface with a brush/brush until it is saturated; do not apply too much product. Excessive use may leave stains on the surface.
5. Apply second coat 2 hours after first coat;
6. Wait 2 hours for the product to dry completely.

RECOMMENDED MAINTENANCE

Ordinary cleaning (everyday)

We suggest to use the product **FANGOROSA SOAP - Universal detergent for all surfaces.**

Alternatively we suggest neutral soap and water. Do not use alcohol, acid-based detergents, solvents or ammonia. Do not use aggressive, acid or alkaline detergents.

Extraordinary cleaning

We suggest to use the product **Nutrient** for external surfaces. For the extraordinary cleaning do not use alcohol, acid, solvent or ammonia based detergents. Do not use aggressive, acid or alkaline detergents.
