

MARBLE

	USE
Interior flooring and wall coverings	YES
Exterior flooring and wall coverings	NO*

*in geographical areas where the temperature falls below 0°C.

INSTALLATION TIPS

- Tiles should be installed on a dry, level, firm screed. Rising damp can cause stains on the surface;
- Lay tiles dry, to verify product squareness and flatness;
- The choice of the type of adhesive must be compatible with the existing substrate.
- Recommended type white or gray class C2TE or C2TE S1;
- Apply the adhesive evenly on the screed using a wide-tooth trowel. Apply the adhesive also on the back of the tiles;
- Position the tiles by hand, without hammering them, leaving a thin gap of 1-2 mm;
- Check the correct vertical and horizontal alignment of the tiles;
- Use the glue to uniform the flatness (always keep the surface clean);
- Wait for complete drying according to the adhesive drying time.

The laying is followed by the grouting.

The surface must be grouted with cement grout - fine grain (we do not recommend epoxy grout);

Wait at least 24 hours for complete drying.

For two or three days after installation, it is necessary to wash the floor well with **FANGOROSA SOAP - Universal Cleaner for all surfaces** once a day, before proceeding with the treatment.

Do not cover the floor; let it breathe unless there is an urgent need to work.

Do not place cardboard on the floor because it may stain the surface if it is wet or nylon that does not allow it to breathe.

Lay only non-woven fabric that has been cleaned of dirt from the work site.

The next step is the treatment with the product **FANGOROSA marble - A treatment**.

Apply one coat of product on marble with polished finish; two coats on polished finish.

Spread the product with the help of a brush or, if applied on the floor, with a spreader fleece evenly over the marble surface until it is saturated; do not apply too much product. Excessive use may leave stains on the surface.

Wait 2 hours for the product to dry completely.

MARBLE

RECOMMENDED MAINTENANCE

Ordinary cleaning (everyday)

We recommend the use of the product **FANGOROSA SOAP - Universal daily cleaner for all surfaces**. Alternatively we suggest neutral soap and water.

Do not use alcohol, bleach, acid-based detergents, solvents or ammonia. Do not use harsh, acid or alkaline detergents.

All products are available at www.fangorosa.com
